

OE-GNG Hand-Held Test Set for NVD's

The OE-GNG Test Set is a hand-held, battery powered unit for field testing Night Vision Devices (NVD's). It is used by field personnel to determine the operational readiness of a NVD by checking its optical performance.

The OE-GNG Test Set is a self-contained test device that allows its operator to make go/no-go decisions regarding the spatial resolution adequacy, under low and high light levels. The OE-GNG Test Set uses a single 1951 US Air Force Resolution Test Target.

Main Features:

- ✓ Easy to assemble and operate
- ✓ Test both gen II & gen III tube
- ✓ Test under low & high light levels
- ✓ ITAR free

System specification:

Operating Temperature	-15°C to +55°C
Light source	IR LED 810 ±50nm
Resolution target	USAF 1951
Weight	650g
